Oregon ACCESS Release 22.11 Changes

- **CAPS 2 Corrections**

- Assessment Status changed to Incomplete prematurely
 - If an assessment was created and Oregon ACCESS timed out before the worker entered the Assessment Date, the assessment status was changed to Incomplete during overnight processing. This problem has been corrected.

- **Remote ACCESS**

- Provider names will now appear in Service Plans when the case is checked out.
- The 'Send 512 To' box on the Contacts Tab is now disabled in consolidated when the case or assessment is checked out.

- **Miscellaneous Items**

- Sorting of the Roles and Case Names on the Person Detail screen has been changed so the Primary Applicant, when present and active, will always appear first in the list.
- 'Hold' Incoming Code and associated fields removed
The Hold incoming code was removed from CMS as one of the system changes for MMIS. The 'Tr-Cd:', 'Hld Type:' and 'Hld Rsns:' fields were also removed from the UCMS screen as part of this change.
 - The following associated changes were made in Oregon ACCESS:
 - ◆ The Hold Incoming Code was removed from the drop down list of the 'Incm' field on the Medical Assistance tab. The letters HO will appear in this field if the last incoming code selected was 'Hold'.
 - ◆ The 'Tr-Cd:', 'Hld Type:' and 'Hld Rsns:' fields were removed from the UCMS screen that appears during the integration process.
